⁶. A 'Glasgow' estimate provided is from Table 4.7 (p9) of Socio-economic Change in the Glasgow Conurbation: Employment and Economy, a report by James Arnott (DRS, Glasgow City Council) and is based on data from the following job centres:

Easterhouse, Glasgow Central, Glasgow West, Hillington, Maryhill, Parkhead, Shawlands and Springburn

Table 4.7	1971	2004
Manufacturing as % of all employment	34%	6%

⁷. Working out of Poverty: a study of the low paid and working poor, Graeme Cooke and Kayte Lawton, IPPR, Jan 2008.

Note: Pay ratios were calculated by dividing the hourly pay rate, excluding overtime, at the 90th percentile by the equivalent figure at the 10th percentile.

By factoring out percentiles 1-9 and 91-100, these ratios do not compare the very highest and very lowest paid.

⁸. Projections contained in Review of Local Transport Strategies and RTRA Reports Final Report (Scottish Executive, Oct 2001)
